LAKE MICHIGAN
Lighthouse Map & Circle Tour

Many people have seen the 1,700-male' Lake Michigan Lighthouses on their summer vacations. However, a closer look at these beacons reveals the history of Michigan's Great Lakes, its trading history, the people who kept watch and protected these ships and passengers. Some even became legends in their own right.

While a loosely-organized "circle route" was created in the late 1990s by a local group, a more formal "Circle Tour" was formally organized by the Michigan Lighthouse Association in 2016. The tour was expanded to include previously unvisited lighthouses on the Illinois and Wisconsin coasts. The following is a list of Lighthouses that are part of the Circle Tour, including those that have been recently restored.

In 2016, more than 400 people joined a trip to explore one of the dozens of port tours around Michigan's Great Lakes. The tour was designed to attract visitors to explore these historic lighthouses and learn about their history and significance.
